

3rd Annual Lincoln Air show & Airport Day, October 4, 2008:

Jim Grimes photos will be provided in a separate word document to follow, and will be posted on the web site later by our web master Ken Iwahashi. Jim Grimes shared his comments about the Lincoln Air Show & Airport Day, and they follow below; "(Photos include;) A jet canard aircraft, no details Taylor craft with shot wings aerobatic and bi planes Mustang routine and the Ercoupe gang. Maynard Smith was giving the young eagles rides, and the ending show was Julie Clark and her T-34. I also met Julie around 1972, she landed in Hayward with her new airplane she bought which she had to do a lot of work on, her canopy was stuck so I got it free with some WD40. She became a good friend of Skeed Myers. Over the years I saw her perform at different air shows, then I saw her again a few years later a Santa Rosa air show, and I was able to speak to her at Lincoln air show and she gave me one of her books. I want to thank Buzz D. for donating the landing gear part for my Ercoupe and Maynard also getting it to Lincoln! Thank you very much!!! Jim Grimes"

The Lincoln Website has additional details. <http://www.lincolnairportday.com/>
